ULTIMA
EDITION

FINAL

THE AGE OF THE EMPEROR IS A BITTER BLOW FOR ORK 'KULTUR'. THE 'UMIES HAVE ARRIVED IN A NEW FANGLED IMPERIUM AND ARE METHODICALLY DRIVING BACK THE ORKS TO THEIR MIGHTY EMPIRE OF ULLANOR. NOW THE GREATEST ORK NATION HAS BEEN DESTROYED AND DA BOYZ ARE SCATTERED... FOR NOW. HISTORY RECORDS YOU AS ONE OF THE COMMANDERS TAKING PART IN WHAT HAS BECOME KNOWN AS "THE GREAT CRUSADE"; A CAMPAIGN THAT CHRONICLES ORKY KIND'S QUEST TO BEAT BACK THE FLEDGLING IMPERIUM AT THE DAWN OF THE 31ST MILLENNIUM...

IMPORTANT!

THIS IS NOT A TOURNAMENT. YOU WILL GET MORE OUT OF THE WEEKEND IF YOU ENJOY THE EXPERIENCE RATHER THAN FOCUS ON THE OUTCOME OF YOUR GAMES. TRY AND PLAY WITH YOUR OPPONENT RATHER THAN AGAINST THEM.

The Tempus Fugitives have designed this campaign weekend to be (we hope) as enjoyable as possible. Once again (all together now) **it is important to remember that the campaign weekend is not a tournament.** If you are expecting anything other than to just have fun – turn back now! The games you play are all connected to part of a greater battle – the Great Crusade by humanity to claim the galaxy from the alien species that dominate it.

Games Workshop has a really fantastic Throne of Skulls Grand Tournament programme and should you want to get involved in a true test of your skill at Warhammer 40,000 please contact Direct Sales on 0115 91 40000 or see the events page at www.uk.games-workshop.com

The Age of the Emperor: The Great Crusade campaign weekend presents Games Workshop hobbyists with an opportunity to play in a different style than they may be used to. In short, Tempus Fugitives' campaigns are all about trying out new ideas and contributing to an adventure. In fact the

story is almost as important as the actual games themselves and players should be prepared to get into the mindset of the army they have brought to battle with.

If you and your opponent have a great game, the actual outcome of the battle becomes less important. Once more (with feeling), you are playing with your opponent – not against them.

The team running the event is there to help describe the campaign story as it unfolds and they will work out what impact your games have upon it. Most importantly they are there to ensure everybody has a great time. **Remember – it's only toy soldiers!**

Games will be driven by the narrative of the campaign. This means that during the course of the event various games may appear a bit one-sided when viewed from the usual gaming perspective.

In any war, commanders have to deal with unfair and unbalanced situations, using cunning and skill to prevail against overwhelming odds, and the same may be true for you. However, whatever the scenario or battlefield conditions, your game and your story will always count in the big scheme of things; the Tempus Fugitives will always try to make sure that you are not asked to play a game you simply can't win before any dice are cast. There will always be critically important mission objectives that you will need to strive to achieve.

Most importantly remember that, as this is a team event, even if you lose your individual battle your taskforce or faction may still do well overall; don't worry about 'winning', just think about having a good time.

It is our hope that we can repay some small part of the kindness that the gaming community has shown us over the years and organise a top notch event that everyone can enjoy.

Steve M

ACKNOWLEDGMENTS

This weighty tome you hold in your slightly clammy hands is the roadmap for the latest Tempus Fugitives Warhammer 40,000 campaign weekend. We have not arrived at this point by mere chance or by some whim; instead we are here because of a number of important people helped us along the way. The bad news is that the list is quite lengthy – so we'll group them together so as to hopefully not leave anyone out.

Most important of all - the Tempus Fugitives would like to thank **Games Workshop** for giving many of us jobs and all of us a grim darkness to play with. Without their universe to run around in, we'd all be playing Risk or Sudoku...

The wives, girlfriends, boyfriends, partners and right hands of the Tempus Fugitives – for letting their worse halves go and play with lead dollies 'up north' several times a year. The Tempus Fugitives are most serious about their work and no fun was had in the preparation of this weekend... Any rumours of 80's disco dancing on the revolving stage in the Reflex bar in Nottingham high street are completely unfounded.

My personal thanks go to **Andrew Fish** for his continued input and creativity both with the campaign packs as well as the website.

The **UK Events team** deserve mention here. The support received over the years from **Brian Aderson** and **Andy Joyce** has meant that we have had the confidence to try and pull these events off.

And last but not least we'd like to thank all those who have visited our website and forums. The feedback and support given to our campaign weekends has encouraged us to try and put together the best Warhammer 40,000 campaign weekend we possibly could.

OUTLINE OF PLAY

In addition to your fully painted army and this campaign pack you will need the following:

- The English language version of the Warhammer 40,000 5th Edition rulebook.
- Dice, Templates, objective counters and Tape measure
- Superglue and poly cement
- The appropriate English language version of your Codex and any Imperial Armour material relating to your army. No photocopies!
- At least two copies of your army roster
- A Tray to carry your models
- Pen and paper

Upon arrival each player will be assigned to a team, called a Task Force, containing up to eight players. You and the other players in your Task Force are allied field commanders fighting as part of the **Imperial Expedition Fleet** or one of the alien domains arrayed against them – **Pacificus**, **Obscurus**, **Tempestus** and the **Ultima**. These domains contain a number of dominant alien factions each with their own agendas and they represent the five sides of the conflict as they battle it out to determine the fate of the galaxy.

The campaign will be fought in six rounds and take place on a number of Warzones. Each round a series of battles will be fought using the 5th Edition Warhammer 40,000 game rules. Each player within the campaign will take part in each round.

Each faction has a number of objectives to achieve over the course of the weekend. These objectives will be revealed as the campaign unfolds.

There are a number of Task Forces for each faction each with their own agendas, strengths and weaknesses. When you purchase your ticket you are assigned to a taskforce. Before the first game on Saturday you will be asked to gather at one of the task force muster points and nominate a Task Force Commander. The role of the Task Force Commander is of crucial importance to the team and it is the Commander's responsibility at the end of each game to collate results and hand those back to your Faction Marshal, who will be represented by a member of the event team. **Do not elect an incompetent Taskforce Commander – you will regret it!**

Initiative

The initiative in the first round is determined by the narrative for each Warzone and is indicated under the Warzone description. Initiative in each subsequent round is determined by the results of the previous round.

At the beginning of each round the Task Force that has the initiative in the Warzone will receive a Mission Briefing which includes a list of mission objectives. The Taskforce Commander (taking advice from the Taskforce) must then decide upon the objective of the turn and may even have the choice of which mission you will play to achieve them. The mission selected must be the same for the whole Task Force – you cannot change it depending on who your opponent is.

Once they have made their joint decision the players in Task Force with the Initiative must select the tables on which the games will be played; players on the opposing side then come over to their assigned Warzone and pair up. Players cannot select tables from outside of their Warzone to fight on.

Deployment and table sides are determined as normal.

Battle Stance

Each round you may set how your taskforce intends to fight – Aggressive, Defensive or Balanced. Aggressive stance awards bonus points for wins but nothing for draws or losses, defensively rewards wins and draws equally. As you must decide your Battle Stance before you play your games each round you have to rely on your judgement as to its outcome. Chose carefully as picking an aggressive stance makes your draws worthless, while defensive stance squanders any bonus from winning. If in doubt choose a balanced stance.

As your games finish you must report the result (Win, Lose or Draw) to the stage along with your opponent. You cannot give your results in without your opponent present.

What You Will Need

You will require a painted Warhammer 40,000 army designed to create four distinct forces, as indicated in the following sections. You will require at least two copies of your army lists. These must include all of the models in your army, their point values, and the points of any upgrades or wargear. One of these you should keep with you during the entire weekend, and the other should be handed in at registration for inspection by a Task Force Marshal.

You will need to arrange somewhere to sleep overnight. (For help contact Nottingham Information Centre on 0115 915 5330) and you will need to arrange transport to and from the event. It is also useful to bring some spending money for refreshments.

CRUSHING DA HUMANS IN DA AGE OF DA EMPEROR

The Tempus Fugitives

If you have any questions about rules, registration details or the event then either e-mail us at: tfevents@tempusfugitives.co.uk or write to us at:

The Tempus Fugitives

From the moment of entry into the event the decisions of all Tempus Fugitive event staff (who will be clearly identified at the commencement of the event) in all issues of fair play and health and safety are final. No discussion will be entered into once a decision is made. Players are asked to participate in the Age of the Emperor campaign weekends in a sporting and co-operative manner. Players that fail to do so will be penalised in a simple Yellow and Red card system issued at the Tempus Fugitive event team's discretion. A Yellow Card offence which is repeated will result in a Red Card being given which requires the player to be excluded from the event.

5th Edition Rules of Engagement

The Warhammer 40,000 5th Edition rules will be used for this campaign weekend, as will the latest Frequently Asked Questions (FAQ) documents from the Games Workshop website. These errata have been specifically updated for 5th Edition and are of real importance for players taking part.

There are several significant changes to the way the game plays compared to 4th Edition (and on the whole they make for a vastly more enjoyable game!) On the Tempus Fugitives forums and in various playtesting

games several 'interesting' interpretations of the rules came up as well as certain changes to the rules being forgotten and 4th Edition used instead. So here are a few reminders and clarifications to keep in mind as you battle for galactic dominance.

Annihilation Kill Points: Each unit is worth one Kill Point. An important exception is an Imperial Army Infantry Platoon - see Codex Imperial Guard or the Imperial Army section of this pack. Units brought back into play after being destroyed are worth a Kill point each time they are destroyed. Primarchs are worth two Kill points.

Combat Resolution: The winning and losing of close combats is decided purely by the number of unsaved wounds inflicted. There is no more outnumbering, or ratios. If one squad inflicts at least one more wound upon its enemy that it receives, it wins the combat, pure and simple. Furthermore, the losing squad must take a Morale check to remain locked in combat, but taken with a negative modifier equal to the number of wounds by which it lost the combat! (Fearless units who lose close combat must instead take a number of additional wounds, which can be saved, equal to the number of wounds by which it lost the combat!)

You may never move into combat with an enemy unit unless as part of an assault move at the beginning of the assault phase. So no sweeping into an enemy unit after wiping out their next door neighbour, no rolling up the Imperial Army gun-line and no Righteous Zeal moves into combat after their opponents shoot them.

Dawn of War: A marine unit split into Combat Squads count as two Troop choices for Dawn of War deployment.

Deep Striking: If a unit suffers a deep-strike mishap and rolls a 3-4 on the mishap chart, their opponent MUST deepstrike the unit in a valid location (not off the table, into impassable terrain or another unit).

You can run after entering play via Deep Strike (but may not assault unless the unit's rules **specifically** state otherwise). Drop Pods may not shoot on the turn they land.

Feel No Pain: Now this ability is ignored by plasma and other AP2 or AP1 weaponry.

Last Man Standing: There is no rule for Last Man Standing in 5th Edition.

Leadership: A unit under half strength no longer receives a penalty of -1 to their leadership.

Pistols: Now Assault 1 and so pistols cannot be rapid fired if you are stationary.

Lightning Claws, Power Klaw & Thunder Hammers: You cannot get +1 attack for an additional close combat weapon with these unless that additional weapon is also a Thunder Hammer or Power Fist.

Relic Blades: Grant the user Strength of 6. This cannot be improved in any way or be combined with an additional close combat weapon.

Campaign Rules of Engagement

Except for the Heavy Assault force, each player will require an army selected from a single army list - see the section entitled Permitted Armies.

You must have enough models to field your army as a Heavy Assault force.

All models within your armies should conform to "what you see is what you get" (WYSIWYG). In other words, all equipment that can be appropriately shown should be clearly modelled on each miniature.

Units (but not formations) from the Apocalypse Expansion, Apocalypse Reload and Imperial Armour: Apocalypse are permitted in this campaign. Home-made Apocalypse datafax are not permitted.

Vehicles detailed only in Forge World's Imperial Armour publications may be used. If a vehicle is described in more than one Forge World publication (for example the Griffon), the most recent version must be used. If the vehicle has an Apocalypse Datafax available for it then that should be used instead. Please contact the Tempus Fugitives if in doubt.

No 'VDR' rules are permitted in the campaign.

The Warhammer 40,000 Cities of Death expansion will not be used in this campaign.

With a few notable exceptions, you may not include Special Characters from any army Codex. Any named characters available to the armies participating in the Great Crusade will be indicated on the relevant army selection page.

No allies of any kind may be taken in an army (including Kroot Mercenaries, Grey Knights etc). Instead Armies

may use the Faction Specific Units instead which are found in this document.

Any reference to 'your army' or 'the entire army' always refers to your specific forces and not those of any player allied to you or playing with you in a doubles game. This avoids confusing issues such as multiple Legion tactics or other such benefits.

Any reference to 'friendly' units or models may be applied to both your units as well as those of any allied players you are battling alongside in a doubles game.

Should anything particularly notable happen during the course of your game, such as an act of extreme heroism or crushing tragedy, please let your Faction Marshal know about it as your deeds may well become one of the legends of the Age of the Emperor...

Painting and the Best Army Award

The Age of the Emperor was a time of hope and glory for the fledgling Imperium of Mankind. We would ask all players to choose painting schemes that reflect the Warhammer 40,000 universe during this time and doing this will greatly increase everyone's enjoyment of the campaign.

All models **MUST** be painted and representative of the appropriate type of troop. Models must at least be based on or include a significant part of a Citadel miniature. **You cannot use a model that does not meet these criteria. If you are planning a conversion that you think may need clarification please contact us before the event.**

At the Age of the Emperor: The Great Crusade Campaign Weekend we will give an award for the Best Army. This is awarded to the player who participates in the weekend with a force that, in the opinion of both players and judges, is the best in terms of painting and character.

To qualify as the 'Best Army' particular attention will be paid to well themed armies which reflect the time of the Great Crusade as humanity pushes outwards from Terra to reclaim the galaxy as their birthright.

Because we believe that due credit should go to players that have painted their own armies, only players who have painted their armies themselves may be eligible for the coveted award of Best Army. We ask all participants to be honest if shortlisted.

A number of armies will be shortlisted on the Saturday lunch break and then will be voted on by the players during the Sunday lunch break. The winner will be announced at the end of the Campaign Weekend.

Awards Ceremony

The Age of the Emperor was a time of heroism and the Awards Ceremony is an opportunity to give recognition to those who have made great sacrifice on the altar of war. As soon as possible after the conclusion of the final game we will begin the awards ceremony and we strongly recommend all players to stay for the ceremony to cheer (or commiserate with) those awarded!

A note on unique units and named characters:

The whole point of playing in a 'historical' setting is to allow you to re-enact some of the fantastic battles you have read about in the books and novels. You are actively encouraged to use these units and characters. An Ork army without Urlag Urkk or Teefin Skumm just isn't quite as exciting! However, as this is a wargame it is possible that you will either play alongside other players with the same characters or may even pair up with them for the doubles. Just assume that either one of the duplicate characters is just a similar character or pick another partner.

GAMES 1 & 4 RECON DOUBLES

Small forces sent ahead of the main army, Recon Detachments are selected according to the following restrictions. Part of the fun of these small armies is doing something a bit unique that you might not have the time to do with a larger army.

Each player must have no more than 1000 points.

Recon Detachments fight the Capture and Control mission using the Spearhead deployment from the 5th Edition Warhammer 40,000 rulebook.

Recon Detachments must have one troop choice. You may spend remaining points from anywhere in the Codex subject to the Recon Detachment Force Organisation chart provided.

No Formations, Legendary Units or units with Structure points

Artillery, Flyers or Battlewagons may not be taken. Vehicles such as these are not deployed for the type of missions undertaken by a Recon Detachment.

No Monstrous creatures, or vehicles with an armour value of 12 or higher on any facing (except dedicated transports)

No ordnance weapons or models with a 2+ armour save are allowed.

One Troop choice without a transport may be deployed as forward sentries. The unit operates in a dispersed formation of up to 3" between each model and gains the Infiltrate universal rule (or stealth if they already have infiltrate). The unit does not count as a scoring unit and always uses the lowest leadership value within the unit for taking morale tests (representing the unit operating away from the command structure).

Up to two units may purchase the Stealth ability for 30 points. This should be modelled appropriately as either a technological or camouflage application). Dedicated transports for units with the Stealth upgrade may also be given the Stealth ability for an extra 30 points. These are in addition to any other units or characters that have the Stealth ability.

GAME 2 - MAIN BATTLEFORCE

Once the enemy has been located, larger forces are brought to bear. It is a calculated use of force in the main Battleforce that tries to achieve the objectives of the war before either side can mobilise the heaviest of their armour. Main Battleforce are chosen as follows:

- Main Battleforce usually (but not always) fights the Annihilation missions from page 91 of the 5th Edition Warhammer 40,000 rulebook. Remember: Taskforces with the initiative may decide which mission to undertake to achieve their objective. All members of the Task Force must play the same mission and they must inform their opponents before the game begins.
- Must be no more than 2000 points.
- May include models or units from the Recon Detachment and the Deathblow Detachment but may not use any of the additional benefits provided by the Recon Detachment or Deathblow Detachment (such as Stealth or Forward Sentries).
- Is selected using the Standard Missions Force Organisation Chart found in the 5th Edition Warhammer 40,000 Rulebook. Ork armies may include one additional Heavy Support choice than is normally permitted (giving a total of 4 for a Main Battleforce)
- Models with rules in the Apocalypse rulebook or Imperial Armour: Apocalypse MUST be used over those found in other Imperial Armour books (for example the Valkyrie and Hydra).
- May NOT include units with Structure points, Gargantuan Creatures or any Apocalypse Formations. They may include Legendary units.
- Any Flyers use the rules for aircraft found in the Apocalypse expansion. All hits against Flyers are glancing and Flyers can never count as obscured.
- Vehicles detailed only in Forge World's Imperial Armour publications may be used. If a vehicle is described in more than one Forge World publication (for example the Griffon), the most recent version must be used.
- Units (including vehicles) carrying Rokkit launchers or vehicle mounted Defensive weapons may be upgraded to AA capability for +10 per weapon. These weapons (like all pintle mounted weapons) hit flyers using the model's BS rather than only on 6s.

GAME 5 - DEATHBLOW

On occasion a larger conflict can be prevented by sending in a small elite strike force to annihilate the enemy's command structure. Deathblow Detachments are selected according to the following restrictions. Part of the fun of these small armies is doing something a bit unique that you might not have the time to do with a larger army.

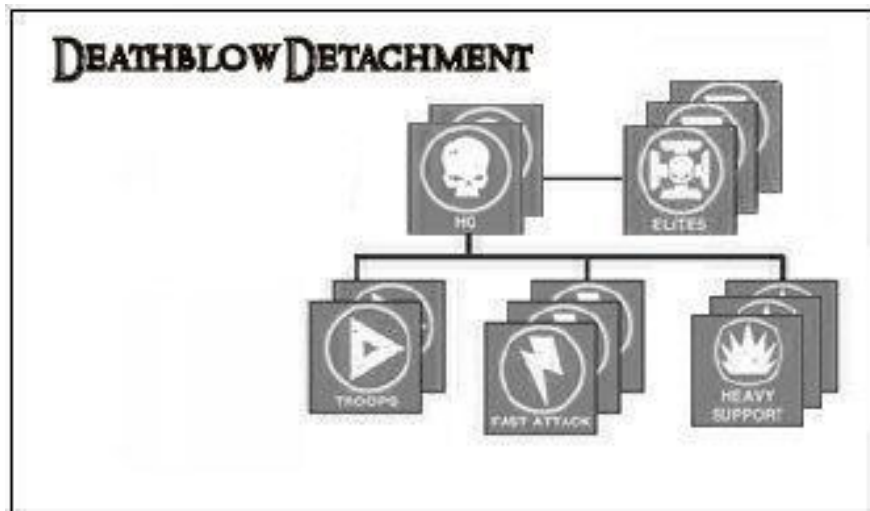

Each player must have no more than 1000 points. At least 400 points must be spent on Elites and HQ choices.

Deathblow Detachments fight the Annihilation mission using the Dawn of War deployment from the 5th Edition Warhammer 40,000 rulebook.

Deathblow Detachments are selected according to the Deathblow Detachment Force Organisation chart provided.

No Formations or units with Structure points. They may include Legendary Units.

Flyers may not be taken. Units such as these are not deployed for the type of missions undertaken by a Deathblow Detachment.

The best means of Defence is Attack, an' the best means of Attack is a really really Big One, right, with lots of Boys an' dead big shooty things an' what have ya. – *Derek Zog*

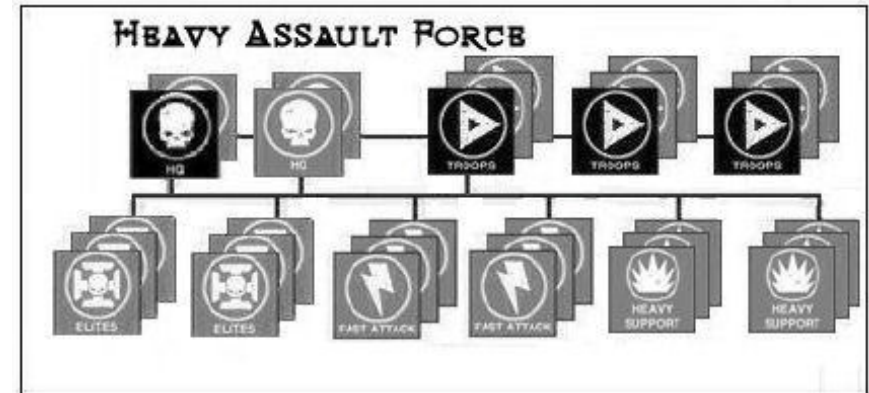

Hit 'em hard, Hit 'em low and give 'em plenty of Dakka – *Uzgob*

Orkz is made fer' two fings! Fightin', and winnin'! – *Urlakk Urg*

GAMES 3 & 6 - HEAVY ASSAULT FORCE

Smashing aside all but the most solidly built defences, the Heavy Assault Force represents conflict on an almost unimaginable scale. The army is subject to the following restrictions:

- Must be no more than 3000 points and is selected from the Heavy Assault Force Organisation Chart. They may include Legendary Units (which, unless specified, count as HQ choices).
- Up to 1000 points of the Heavy Assault Force may include Gargantuan Creatures and units with Structure Points. Each unit taken counts as a Heavy Support Choice unless otherwise specified. These units use the rules found in the Apocalypse expansion.
- Stompas: Ork players may include the following Stompa variants: Stompa, Wierdboy Stompa, Big Mek Stompa, Goff Rock'n'Rolla Stompa, Klaw Stompas and Kustom Stompa. Datafaxes for these are available in the Apocalypse rulebook, in this campaign pack and online.
- A Heavy Assault Force usually (but not always) fights the Seize Ground missions from page 91 of the 5th Edition Warhammer 40,000 rulebook. Remember: Taskforces with the initiative may decide whether or not to undertake a special mission to achieve their objectives so make sure your army works in more than one type of mission. All members of the Task Force must play the same mission and they must inform their opponents before the game begins.
- Any Flyers use the rules for aircraft found in the Apocalypse expansion. Each unit taken counts as a Fast Attack Choice unless otherwise specified. All hits against Flyers are glancing and Flyers can never count as obscured.
- Models with rules in the Apocalypse rulebook or Imperial Armour: Apocalypse MUST be used over those found in other Imperial Armour books (for example the Fighter Bomber and Battle Fortress). Vehicles detailed only in Forge World's Imperial Armour publications may be used. If a vehicle is described in more than one Forge World publication (for example the Griffon), the most recent version must be used.
- Units (including vehicles) carrying Rokkit launchers or vehicle mounted Defensive weapons may be upgraded to AA capability for +10 per weapon. These weapons (like all pintle mounted weapons) hit flyers using the model's BS rather than only on 6s.
- Heavy Assault Force games are played on a 6x4 table for singles and a 12x4 table for doubles games.

DEFEND DA EMPIRE!

SEGMENTUM SOLAR

Da 'umies are invading da rest of da galaxy from dis part of space. If we iz gonna smash 'em forever we must smash 'em 'ere!

Imperial Forces have the Initiative here. While Imperial forces have majority control here all Imperial players may re-roll a single dice roll once per battle.

Tempestus Forces have the Initiative here. While Tempestus forces have majority control here all Tempestus players may re-roll a single dice roll once per battle.

AFTER ULLANOR - DA BOYZ ARE BACK

Ullanor was a vast empire of Ork Overlord Urrlak Urruk during the Great Crusade. The Imperium of Mankind began their assault with many of their genetically engineered Astartes Legions. While several Space Marine Legions, supported by newly-raised Imperial Army regiments, were tasked to take the outlying planets of the Ullanor system, the Astartes of the Luna Wolves fleet drove straight for the central world. The force was massive. 100,000 space marines, 8 million Imperial Army Troops, Hundreds of Spacecraft.

Employing his favoured tactic of a direct strike at the enemy HQ units, Horus unleashed his Legion. Drop pods crashed to the ground all around Urrlak's fortress-palace. Heavy shuttles deployed Land Raiders and Predators and armoured Space Marines advanced on the defences. Then, as hundreds of Orks rushed to join the battle on the perimeter walls, Horus and a Terminator detachment teleported directly to the foot of the great central tower. As the Luna Wolves blasted away the guards, mobs from the walls raced back to protect Urrlak. Horus left most of the Terminators to hold back the Orks and pushed on up the tower with just ten Space Marines at his side. At the pinnacle of the tower they found Urrlak in a grand chamber, accompanied by forty of the biggest Orks in his empire. Horus charged straight into the midst of the Nobz, slicing apart the muscled, green bodies with the lightning claws of his battle armour. The Terminators with him similarly crashed into the combat. Slowly they hacked a path through the mob until Horus faced Urrlak himself. The Overlord was an enormous Ork, but he was simply no match for the Primarchs skill and unnatural power. First crippling his enemy, Horus hefted Urrlak's broken body out onto the roof and threw it screaming from the battlements to fall far below amongst the horde of Orks still assaulting the lower levels.

As word of his apparent death spread, the Overlord's empire fragmented. The Imperial forces were able to destroy or drive out the remaining Orks and free the quadrant for Imperial rule within a year.

The lists on the following pages present the participating forces for the Ork Taskforces. In all cases the most recent edition of the Codex will be used. These are the only armies permitted in this Faction during the weekend. If you have any further questions regarding army selection, please contact the event organisers before the weekend and check the forums at www.tempusfugitives.co.uk.

The published Codices used in this campaign for the Orks are: Codex Orks. All supplementary rules to your Codex can be found in this pack.

SCIONS OF GORK AND MORK

There are several units which may be taken by the Orks during the Age of the Emperor: The Great Crusade. They are detailed on the following pages and are considered fully usable for this campaign weekend. However, they are not to be considered official in any way outside of the Age of the Emperor: The Great Crusade Campaign Weekend. Where a unit is restricted to one army, it is clearly indicated in the unit entry.

URLAKK URG – OVERLORD OF ULLANOR

HQ UNIT

ORKS ONLY

400 POINTS

	WS	BS	S	T	W	I	A	LD	Sv
Urlakk Urg	7	2	6	4	6	4	6	10	2+

Unit Composition

- 1 (Unique)

Wargear

- 2 Power Klawz with twin-linked kustom mega blastas.
- Twin-linked Rokkit Launcha
- Giga Armour (Mega armour with a 4+ Inv save)

Unit Type

- Infantry

Giga Armoured Snob

Urlakk Urg may only ever join units of Meganobz or Flash Gitz.

Special Rules

- **Touched by Mork**
- **Furious Charge**
- **Mob Rule**
- **Waaagh!**
- **Independent Character**
- **Kunnin** (Re-roll Seize Initiative).
- **Feel No Pain**
- **Eternal Warrior**
- **Fighty** (May re-roll hits in combat)
- **Da Boss** (all mobs within 12" are Fearless)

Touched by Mork: The Overlord of Ullanor has survived his mauling at the hands of Horus and, although a shadow of his former self, his near-death experience has shown him that great 'kunnin' and even greater 'dakka' will be needed to defeat the 'umies. If you include **Urlakk** then any units in your army may re-roll their shooting with sluggas, shootas and big shootas but may not assault on the turn they do so.

Bad Moon Warlord: Bad Moon armies are particularly snazzy and equipped with the best gunz teef can buy. One Flash Gitz or Meganobz Mob may be taken as a Troop choice in an army led by a Bad Moon Warlord. A Warlord does not share command. You cannot include more than one Warlord in your army.

CHORK NAGHRIZ – DA WALKA, GOFF WARLORD

- Independent Character
- 5+ Inv save
- Da Boss (all mobs within 12" are Fearless)

Roundhouse Kick: Instead of making his normal attacks in close combat, Chork may instead make a single Strength 10 Attack that ignores armour and invulnerable saves. Hits from this kick ignore the Eternal Warrior special rule.

Big Unz: Coming from the super-dense star systems at the galactic core, the Ork horde led by Chork Naghriz is immense. With Nobz the size of warbosses, Orks the size of nobz and grotz the size of Orks it is little wonder that Chork is such a monster in stature himself. If you include **Chork** then any Orc Boyz, Burna Boyz, Tankbustas, Lootas or Stormboyz in his army may be upgraded to Big Unz. They gain +1 Strength, +1 Wound, +1 Initiative and +1 Attack for +13 points per model. This must be applied to every model of that type in the unit.

Goff Warlord: Goff armies are particularly brave in the face of overwhelming enemy force. All units in an army led by a Goff Warlord are Stubborn. A Warlord does not share command. You cannot include more than one Warlord in your army.

Rage

Some Ork warbands such as those belonging to the Snake Bite clan have a rite of passage that every young Ork must undertake. If an Ork is particularly skilled at hunting during his trials then he may be fortunate enough to catch a wild boar. If the Ork is brave enough he may be able to beat the boar into submission so that it will let him ride on its back. The Ork benefits from the speed and ferocity of his mount, whilst the boar, for his part in the bargain, is treated to daily gruel, a smelly sty and the occasional smack on his nozzle with a large stick. As time goes by the Boar is upgraded by the warbands Pigdok and Mekboy to become a ferocious Cyboar. Then the real fun begins.

Squad Composition

- 1 Cyboar Boss & 2 Cyboar Boys

Unit Type

- Beasts

Wargear

- Slugga or Shoota
- Hunting Spear
- Stikk Bombz
- Cyboar

Options

- The Mob may be joined by up to 9 additional Cyboar Boyz at +24 points each.
- The Cyboar Boss may replace his hunting spear with a Power Klaw at +15 points or a big choppa for +5 points. The Cyboar Boss may take a Boss pole for +5 points.
- One Cyboar Boy may be upgraded to a Pig Dok for +30 points. Pig Dok's are equipped with an 'urty syringe, stikk bombs and Dok's Tools.

Cyboar: A Cyboar is extremely tough, reinforced with steel plates and bionic limbs, has its tusks replaced by blades and has an injection device which pumps it full of stimulants. Because of the toughness of the Cyboar and its value as cover, the rider gets 4+ armour save. The bionic augmentation makes the Cyboar a potent additional weapon and the rider counts as being armed with an additional close combat weapon. During assaults and sweeping advances, models mounted on a Cyboar that pass through difficult terrain take an automatic wound (saves allowed), as the Cyboar has a tendency to butt rocks and trees.

Hunting Spear: The Cyboar boyz are armed with long spears tipped with an explosive. They automatically use the spear on the first turn they charge in the game. After use it is discarded. A hunting spear counts as a +1 Strength power weapon and the user strikes with an Initiative of 6. The Ork still gets the benefit of Furious charge with the Hunting Spear and so the total strength bonus is +2.

FAST ATTACK UNIT

ORKS ONLY

100 POINTS

Madboy	4	2	3	4	1	2	2	7	6+

Ork Kultur can sometimes cause self-respecting boyz to look at the orky-know-wots of the world and go a bit... well... mad. The Ork finds his mind full of distractions and contradictions. Wild ideas about the universe buzz round his brain. Curious bits of unconnected knowledge keep intruding upon his consciousness. These disturbed Orks are called Madboyz. While some Madboyz are just plain crazy, others are inspired geniuses whose ideas are immensely valuable to the Orks (and quickly stolen by any Mek worth his teef). All Madboyz are unpredictable and somewhat anarchic, so they live together and on the battlefield they fight as a single mob. Other Orks have the utmost respect for Madboyz, whose crazed notions are seen as a sign of favour from Gork (or possibly Mork).

Squad Composition

- 10 Madboyz

Unit Type

- Infantry

Wargear (would you trust them with anything bigger?)

- Slugga
- Choppa

Transport

Mobs of 20 or fewer models may take a Weirdboy Battlewagon as a dedicated transport for +145 points.

Options

- The Mob may be joined by up to 20 additional Madboyz at +10 points each.

Special Rules

- Fearless
- Furious Charge
- Mob Rule
- Nutty Gitz (May only be joined by Weirdboy!)

Madboy

At the beginning of each Ork turn, the Ork player rolls a dice for each mob of Madboyz and consults the table below. The result applies until the roll is made at the start of the next Ork turn. Weirdboys in the unit allow the result to be re-rolled. The Madboy abilities apply to Weirdboys in the unit:

- 1 We iz dead! The unit is pinned for the turn (even though normally immune).**
- 2 Right Ladz! The unit gains +1 Attack.**
- 3 Oooh, So Strong! The unit gains +1 Strength.**
- 4 I Knows Fung Koo! The Unit gains +1 WS**
- 5 Dats Nuffink! The Unit gains Feel No Pain.**

Crew: Mekboy

Wargear

Kustom Forcefield
Hull Mounted Twin-Linked Kustom Mega Blasta
Red Paint Job

Options

A Mekboy Dragsta may be given any of the following upgrades:

- Armour plates +10 points
- Grot riggers +5 points
- Reinforced ram +5 points

May replace the Kustom Mega-Blastas with a single hull mounted Mekboy Big Gun (does not include crew):

Bubble Chukka	+55 points
Lifta Droppa	+55 points
Traktor Kannon	+55 points
Pulsa Rokkit Salvo	+45 points
Shokk Attack Gun	+40 points

Mekboyz build many kontrapshuns for their warbosses, but they always save the best and craziest ideas for their own kustom speshuls. Mekboy Dragstas (or speedstas) are one of those very special creations and are usually built by Meks in the Kult of Speed. With an engine usually found in a pulsa rokkit and a chassis extended and lowered for maximum speed, the dragsta is simply one of the fastest and most dangerous wheeled vehicles the Orks use. As no Ork vehicle is complete without some fiending device to smash their foes, dragstas usually have bizarre Mekboy contraptions built into them which blast away as the Mekboy races past the battle.

Orks sometimes encounter communities of Ogryns that have not yet been found by the Great Crusade. Naturally a Warboss is only too keen to recruit them into his warband. For their part the Ogryns find the Ork's company amusing and delight in the same destruction and noise as the Orks. As such they begin to consider themselves part of the warband and become driven by the same primal urges that propel the Ork Waagh.

Squad Composition

Tinboyz	3	2	5	5	3	2	2	5	3+

An Ork Big Mek really relishes the chance to get his hands on a captured Imperial robot. This is because Imperial robots are crammed with all kinds of complex gubbins which the Big Mek can use for any number of other projects. In fact it is of constant amazement to Mekboyz that humans waste so many interesting bits on just one robot. Once properly modified, or even built from scratch, an Ork robot is known as a Tinboy. It is traditional to make the Tinboy look like an exaggerated and awkward version of Space Marines, Eldar or some other enemy.

Squad Composition

Unit Type

Wargear

Options

- The Mob may be joined by up to 7 additional Tinboyz at +40 points each.
- Any Tinboy may replace its big shoota with one of the following weapons: a skorcha at +5 points or a deffgun or rokkit launcha for +10 points.

BUBBLE CHUKKA HEAVY SUPPORT UNIT

Mekboy	4	2	3	4	1	1	2	7	6+
Grotz	2	3	2	2	1	2	1	5	-

Unit Composition

1 Bubble Chukka
1 Mekboy
3 Grotz

Wargear

- Mekboy is armed with a slugga and choppa.
- Grotz are armed with blastas.

Unit Type

- Artillery

Bubble Chukka: To fire the weapon, choose an enemy vehicle or squadron (but not a flier or super heavy vehicle). Roll 3d6, provided the total score is equal to or greater than the target's front armour and it is within 36" range it is caught in a force field and immediately rises up, floating a few feet above the battlefield. If they are out of range the shot misses. While in the bubble the unit is invulnerable to all attacks.

A unit caught in the bubble is helpless and may do nothing. Being caught in the bubble blocks all exit points and embarked passengers may not disembark. The bubble may not be attacked by allies outside of the bubble for fear of hitting the unit inside. In each player's movement phase the bubble bounces (with the unit inside counting as moving) 2d6 inches in a random direction. On a roll of a double for the random movement the bubble pops automatically. Should the bubble pop the unit is may act normally on its next turn.

Anything in the bubble's path is simply squashed or batted out of the way. Treat it as a tank shock. Vehicles and terrain are unaffected and instead cause the bubble to automatically pop (releasing the captured unit as above). If the bubble floats off the table the unit inside is considered destroyed. The Chukka can fire once every turn and may have multiple bubbles in play.

Utilising Mekboy force field tek-no-wots the Bubble Chukka creates a force field around its target and lets them float away. Eccentric Big-Meks (is there any other kind?) usually try and perfect one of these contraptions at least once in their lives. The number of Big Meks trapped in bubbles encountered by the Imperial Expedition Fleets in deep space is a testament to how dangerous such a quest for perfection can be...

LIFTA DROPPA HEAVY SUPPORT UNIT

ORKS ONLY

80 POINTS

	WS	BS	S	T	W	I	A	LD	Sv
Mekboy	4	2	3	4	1	1	2	7	6+
Grotz	2	3	2	2	1	2	1	5	-

Unit Composition

1 Lifta Droppa
1 Mekboy
3 Grotz

Wargear

- Mekboy is armed with a slugga and choppa.
- Grotz are armed with blastas.

Unit Type

- Artillery

Lifta Droppa: To fire the weapon, choose an enemy vehicle or squadron (but not a flier or super heavy vehicle). Roll 3d6, provided the total score is equal to or greater than the target's front armour and it is within 36" range it is lifted into the air. If the vehicle is out of range or the roll is less than the vehicle's front armour value then the shot has missed. If the dice rolled are a triple the Lifta Droppa inverts the tractor beam and throws itself the distance rolled in a random direction described below.

Provided the Lifta Droppa has hit, roll a scatter dice. If a hit is rolled the vehicle is dropped on the spot and takes an automatic penetrating hit. If an arrow is rolled then the Lifta Droppa may move the vehicle up to 12" in the direction indicated before dropping it. If the vehicle is dropped on another vehicle then both suffer a penetrating hit and the dropped vehicle comes to rest facing in the direction indicated and to the side of the vehicle which it was dropped on. If the vehicle is dropped on a non-vehicle unit, the unit takes 2d6 wounds (saves permitted) and the dropped vehicle suffers a glancing hit. Move the non-vehicle unit exactly as though it had been tank shocked. If the vehicle is dropped into impassable terrain it is destroyed. The vehicle may not be dropped off the table edge.

Utilising extremely powerful gravity waves, the Lifta Droppa is a marvel of Orky-know-wots. Usually mounted on Mekboy Stompas and other warmachines, a few of them have found their way into field artillery used by the more tooth-conscious Warboss. Able to lift enemy vehicles many feet into the air and drop them on their allies, the Lifta Droppa is a guaranteed crowd pleaser.

PULSA ROKKIT LAUNCHER HEAVY SUPPORT UNIT

Mekboy	4	2	3	4	1	1	2	7	6+
Grotz	2	3	2	2	1	2	1	5	-

Unit Composition

1 Pulsa Rokkit Launcha
1 Mekboy
3 Grotz

Wargear

- Mekboy is armed with a slugga and choppa.
- Grotz are armed with blastas.

Unit Type

- Artillery

Pulsa Rokkit Launcha: To fire the weapon each turn, choose a target within 72" of the launcher. Place a marker at the point of impact. The Rokkit is treated as Ordnance that scatters 2D6". Hits from a Pulsa Rokkit ignores cover. When it has landed, roll on the following table:

1 Dud – The Pulsa Rokkit casing shatters harmlessly on impact. It has no effect (other than making the Mek look stupid).

2 Fzzrcrack - The Pulsa Rokkit sends out a short sharp pulse of force, all units within 3D6" must take a Pinning test.

3-4 Thrrrummm - The ground itself trembles and shakes, all units with a model within 3D6" of the Pulsa Rokkit have their WS and BS reduced to 1 until the beginning of the next Ork turn and must take a Pinning test at -1 Ld.

5-6 Wohhhm - The Pulsa Rokkit thrum and shakes, sending out waves of suppressive energy. All units within 3D6" are pinned (even Fearless units) and take D6 S6 hits, Vehicles (including skimmers and fliers) instead take a glancing hit.

A Pulsa Rokkit is far more than a mere incendiary device. It contains a large and unstable force field generator that teeters on the brink of contradictory physics; should its force field be disrupted, it will collapse with unpredictable but usually devastating results. The Orks like to encourage such a potentially lethal disruption by wiring the force field into a missile and firing the whole contraption at the enemy.

The resultant impact drives the potent force field inside into a state of collapse, sending out great waves of suppressing force that can grind an enemy face first into the dirt. The Pulsa Rokkit Salvo is a smaller version of the massive Pulsar Rokkits that are launched from tall assault ramps. Instead these have more in common with the Imperial Whirlwind launcher, being a salvo of Ork-sized Rokkits held in a rack and designed to be fired over the course of a battle.

Unit Composition

1 Traktor Kannon
1 Mekboy
3 Grotz

Wargear

- Mekboy is armed with a slugga and choppa.
- Grotz are armed with blastas.

Unit Type

- Artillery

Traktor Kannon: To fire the weapon, choose an enemy vehicle (but not a flier or super heavy vehicle). Roll 3d6, provided the total score is equal to or greater than the target's front armour and it is within 36" range it is caught in a force field and is immediately dragged towards the kannon. If they are out of range the shot misses.

A vehicle affected by the Kannon beam is dragged 4d6 inches towards the Traktor Kannon. Each vehicle (friend or foe) struck by the vehicle being dragged suffers an automatic glancing hit. Enemy units in its path suffer tank shock (even if the vehicle being dragged is not a tank). Once the Traktor Kannon has finished dragging the enemy vehicle resolve a single glancing hit on the enemy tank +1 to the result for each terrain feature or vehicle struck. Should the vehicle being dragged strike impassable terrain it travels no further and instead suffers a penetrating hit as though hit by and AP1 weapon.

Nothing says Orky power than when your Traktor Kannon grabs hold of an enemy tank and yanks it across the battlefield. Even better when the tank is smashed into another tank or dragged through a really thin gap between two rocks... well you get the idea!

Weirdboy Tower

Even in his tower surrounded by cables to drain off the more dangerous psychic discharges, a Weirdboy cannot control his powers. At the beginning of each turn roll a D6 and consult the chart below to see what power the Weirdboy has automatically cast. Because of the design of the tower, a Weirdboy automatically passes his psychic test.

1 Wagon-Banger! Energies fly out of the tower and tear through the wagon. The Battlewagon takes an automatic glancing hit.

2 Frazzle. The tower emits a deadly beam of green energy. Resolve as a Frazzle (C:0 pg 37).

3 Zzap! A massive blast like a thunderbolt lashes out. Resolve as a Zzap (C:0 pg 37).

4 Invincible! The Battlewagon is covered in a shimmering barrier. Count as equipped with a Kustom Force Field until the beginning of the next Ork turn.

5 Bampf! The Battlewagon vanishes in a puff of green smoke. Immediately place it anywhere on the board using the rules for Deep Strike.

6 Waaagh! The Battlewagon shudders with the Weirdboy's war cry. Resolve as a Waagh! (C:0 pg 37).
